

Asbestos

Asbestos Surveys

Bradley Environmental hold UKAS Accreditation under ISO 17020 for conducting Asbestos Management, Refurbishment and Demolition surveys.

All of our surveys are conducted in line with HSE guidance HSG264. Our team will locate and identify asbestos containing materials (ACMs) and then carry out a full risk assessment.

Asbestos Management Surveys - for locating and managing asbestos in your building

Refurbishment Asbestos Surveys - required prior to any refurbishment works

Demolition Asbestos Surveys - required prior to any demolition works

Re-inspections and Management Plans

As part of a controlled regular asbestos management programme, our surveyors can re-inspect any previously surveyed property to update the information held on the asbestos register.

Re-inspection schedules can be tailored to your specific requirements which we will establish with you.

The development and implementation of an asbestos management plan is essential in controlling asbestos risk and in most cases, the asbestos survey will be the cornerstone of your management plan.

Asbestos

Asbestos Air Monitoring

Bradley Environmental holds UKAS Accreditation under ISO 17025 to undertake Asbestos Fibre Air Monitoring.

Air monitoring should be undertaken by a qualified asbestos analyst during asbestos works that have been notified to the HSE (Health and Safety Executive).

We offer our services 24 hours a day/365 days a year and can work on one off or long-term asbestos removal projects.

Asbestos Testing

We have three UKAS accredited laboratories nationwide including Birmingham, Wakefield and St Asaph (North Wales). Samples are analysed in accordance with HSG 248 and in-house procedures, using stereo and polarised light microscopy.

Project Management

Our project managers can assist you in the procurement and management of asbestos remediation and removal projects.

Services include evaluating bids and delivering a tender review summary to the client with our recommendation on the bids received.

You can rest assured that our independence and impartiality protects your interests at all times throughout the project.
